A propos de ce livre

Ceci est une copie numérique d'un ouvrage conservé depuis des générations dans les rayonnages d'une bibliothèque avant d'être numérisé avec précaution par Google dans le cadre d'un projet visant à permettre aux internautes de découvrir l'ensemble du patrimoine littéraire mondial en ligne.

Ce livre étant relativement ancien, il n'est plus protégé par la loi sur les droits d'auteur et appartient à présent au domaine public. L'expression "appartenir au domaine public" signifie que le livre en question n'a jamais été soumis aux droits d'auteur ou que ses droits légaux sont arrivés à expiration. Les conditions requises pour qu'un livre tombe dans le domaine public peuvent varier d'un pays à l'autre. Les livres libres de droit sont autant de liens avec le passé. Ils sont les témoins de la richesse de notre histoire, de notre patrimoine culturel et de la connaissance humaine et sont trop souvent difficilement accessibles au public.

Les notes de bas de page et autres annotations en marge du texte présentes dans le volume original sont reprises dans ce fichier, comme un souvenir du long chemin parcouru par l'ouvrage depuis la maison d'édition en passant par la bibliothèque pour finalement se retrouver entre vos mains.

Consignes d'utilisation

Google est fier de travailler en partenariat avec des bibliothèques à la numérisation des ouvrages appartenant au domaine public et de les rendre ainsi accessibles à tous. Ces livres sont en effet la propriété de tous et de toutes et nous sommes tout simplement les gardiens de ce patrimoine. Il s'agit toutefois d'un projet coûteux. Par conséquent et en vue de poursuivre la diffusion de ces ressources inépuisables, nous avons pris les dispositions nécessaires afin de prévenir les éventuels abus auxquels pourraient se livrer des sites marchands tiers, notamment en instaurant des contraintes techniques relatives aux requêtes automatisées.

Nous vous demandons également de:

+ *Ne pas utiliser les fichiers à des fins commerciales* Nous avons conçu le programme Google Recherche de Livres à l'usage des particuliers. Nous vous demandons donc d'utiliser uniquement ces fichiers à des fins personnelles. Ils ne sauraient en effet être employés dans un quelconque but commercial.

+ *Ne pas procéder à des requêtes automatisées* N'envoyez aucune requête automatisée quelle qu'elle soit au système Google. Si vous effectuez des recherches concernant les logiciels de traduction, la reconnaissance optique de caractères ou tout autre domaine nécessitant de disposer d'importantes quantités de texte, n'hésitez pas à nous contacter. Nous encourageons pour la réalisation de ce type de travaux l'utilisation des ouvrages et documents appartenant au domaine public et serions heureux de vous être utile.

+ *Ne pas supprimer l'attribution* Le filigrane Google contenu dans chaque fichier est indispensable pour informer les internautes de notre projet et leur permettre d'accéder à davantage de documents par l'intermédiaire du Programme Google Recherche de Livres. Ne le supprimez en aucun cas.

+ *Rester dans la légalité* Quelle que soit l'utilisation que vous comptez faire des fichiers, n'oubliez pas qu'il est de votre responsabilité de veiller à respecter la loi. Si un ouvrage appartient au domaine public américain, n'en déduisez pas pour autant qu'il en va de même dans les autres pays. La durée légale des droits d'auteur d'un livre varie d'un pays à l'autre. Nous ne sommes donc pas en mesure de répertorier les ouvrages dont l'utilisation est autorisée et ceux dont elle ne l'est pas. Ne croyez pas que le simple fait d'afficher un livre sur Google Recherche de Livres signifie que celui-ci peut être utilisé de quelque façon que ce soit dans le monde entier. La condamnation à laquelle vous vous exposeriez en cas de violation des droits d'auteur peut être sévère.

À propos du service Google Recherche de Livres

En favorisant la recherche et l'accès à un nombre croissant de livres disponibles dans de nombreuses langues, dont le français, Google souhaite contribuer à promouvoir la diversité culturelle grâce à Google Recherche de Livres. En effet, le Programme Google Recherche de Livres permet aux internautes de découvrir le patrimoine littéraire mondial, tout en aidant les auteurs et les éditeurs à élargir leur public. Vous pouvez effectuer des recherches en ligne dans le texte intégral de cet ouvrage à l'adresse `http://books.google.com`

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE TO THE SECOND EDITION

THE first edition of this dictionary having been exhausted, it has been extensively revised, and certain new features and alterations have been introduced into it.

1. The principle of arranging all words according to their actual spelling has been to a considerable extent abandoned. It was admittedly an unscientific one, and opened the door to a good many errors and inconsistencies. The head form in this edition may be either a normalised form or one which actually occurs.

2. Words beginning with *ge-* have been distributed among the letters of the alphabet which follow that prefix, and the sign + has been employed instead of *ge-* in order to make the break in alphabetical continuity as little apparent to the eye as possible. The sign ± has been used where a word occurs both with and without the prefix.

3. References to Cook's translation of Sievers' *Anglo-Saxon Grammar*, and to the Grammatical Introduction to Sweet's *Reader* have been taken out, as Wright's or Wyatt's *Old English Grammar* will have taken their place with most English students.

4. A new feature which, it is hoped, will prove widely useful, is the introduction of references to all, or nearly all, the headings in the *New English Dictionary* under which quotations from Anglo-Saxon texts are to be found. A vast mass of valuable information as to the etymology, meaning and occurrence of Old English words is contained in that Dictionary, but is to a very large extent overlooked because it is to be found under the head of words which are now obsolete, so that unless one happens to know what was the last form which they had in Middle English, one does not know how to get at it. This information will be made readily available by the references in the present work, which will form a practically complete index to the Anglo-Saxon material in the larger dictionary and will at the same time put the student on the track of interesting Middle English examples of the use of Old English words. Besides directing the reader (by means of quotation marks) to the heading in the *New English Dictionary* where the relevant matter may be found, an indication has been given of the

Digitized by Google

texts from which quotations are made therein, when these do not exceed four or five[1].

5. There have been many valuable contributions to Anglo-Saxon lexicography (by Napier, Swaen, Schlütter, Förster, Wülfing and others) since the first edition of this Dictionary appeared, and these have been made use of, but (as before) unglossaried matter has not been systematically searched for words not hitherto recorded in Anglo-Saxon Dictionaries[2].

6. The number of references to passages has been very largely increased. All words occurring only in poetical texts have been marked. If they occur more than once they bear the sign †, if only once, a reference to the passage is generally given. If not they are marked ‡. As regards prose texts, the rule has been only to give references to particular passages in the case of rare words,—more especially ἅπαξ λεγόμενα. The references to AO, CP and Æ which were given in the earlier edition have been retained, as a useful indication that the word occurs in Early West Saxon or Late West Saxon prose, as the case may be.

7. By various devices it has been found possible, while much increasing the amount of matter in the book, to add very slightly to the number of pages, and at the same time to reduce the number of columns on a page from three to two. Most of these devices are more or less mechanical, but one method of saving space may be mentioned. Certain compound words, descriptive of places, which, as far as I know, occur only in charters and which may often be more correctly regarded as proper nouns, have not been separately inserted. Their meaning can however always be ascertained by referring to their components, and where the abbreviation Mdf is inserted the reader will understand that examples of words so compounded, or of the components, or of both, will be found in Birch's *Cartularium Saxonicum*, or in Earle's *Land Charters*, and that references to those examples are given in Middendorff's *Altenglisches Flurnamenbuch*.

8. In the List of Abbreviations, etc. at the commencement of the book, editions of texts which are furnished with a glossary have been specially indicated.

[1] As regards the letter W and some small parts of other letters which have not yet appeared in the *NED*, a reference has been given to its abridgement (*The Concise Oxford Dictionary*).

[2] The part of the Supplement to 'Bosworth-Toller' which has already appeared shows that Professor Toller is examining such matter with great care and thoroughness.

LIST OF SIGNS AND ABBREVIATIONS WITH THEIR EXPLANATION

Note 1. Where references are in *italic type*, quotations from the texts indicated will be found in the *New English Dictionary*, under the head of the English word which is distinguished in the article by quotation marks (see Preface). In references to special passages volumes have been marked off from pages by an inverted full stop, and lines or verses have been shown, *where they follow other numerals*, by small superior figures. Occasionally where lines have not been given, the mark ′ has been inserted to show that the quotation is in the lower half of a page.

Note 2. In the following list the number (1) after an edition of a text indicates that the edition is supplied with a complete referenced glossary or word-index, (2) that it has a complete glossary, but without references and (3) that it has a partial glossary or word-index.

Note 3. Some of the abbreviations given below are used in combination. Examples: MtLR = the Lindisfarne and Rushworth MSS of St Matthew; BJPs = the Bosworth and the Junius Psalters; asf. = accusative singular feminine. EK = Early Kentish.

‘ ’ Quotation marks are used to enclose the English words which should be looked up in the *NED* in order to find etymological information as to, and examples of the use of, the Anglo-Saxon words to which the articles in this Dictionary relate, see Note 1 above. If they enclose Latin words, they indicate the lemmata of Anglo-Saxon words in glosses or glossaries etc., or the Latin equivalent of such words in the Latin texts from which they are translated. The Latin is especially so given when the Ags. word seems to be merely a blindly mechanical and literal equivalent.

* is prefixed or affixed to hypothetical forms. Normalised forms of Ags. words which actually exist are not usually so marked.

′ See Note 1 above.

\+ = ge-.

± indicates that the Ags. word to which it is prefixed is found both with and without the prefix ge-.

† = occurs in poetical texts only.

‡ = occurs in a poetical text, and once only.

⊨ This sign is used to indicate that the words which it follows, *and its compounds*, are to be found in the Dictionary under the heading given after it, thus meht⊨miht is equivalent to meht = miht *and* meht- = miht-.

a. = accusative.

A = Anglian, or, if followed by numerals, Anglia, Zeitschrift für Englische Philologie, Halle, 1877 etc. AB = Anglia Beiblatt.

Æ = Ælfric. (References followed by numerals in parentheses refer to certain Homilies attributed to Ælfric in HL.) If followed by a book of the Bible the reference is to that book in *Ælfric de vetere et novo Testamento* (Bibl. der Ags. Prosa, vol. 1).

ÆGr = Ælfric's Grammatik und Glossar, ed. J. Zupitza, Berlin, 1880.
